

## Tilt & Turn Windows

THE turn and tilt double-glazed window is ideal for the upper floors of houses or flats, meeting the latest fire escape and cleaning regulations. The window has a two-fold operation, with the return position allowing the sash to open inwards like a door, enabling the outer pane of glass to be cleaned from inside the room. This also provides a fire escape route, with the sash opening fully to expose a clear exit point and the tilt position is ideal for ventilation.
