

McLeod Glaziers

McLeod Glaziers were established in 1836 and are extremely proud of the heritage that it has to this day. The pride in that heritage transmits to the companies drive to evolve, develop and compete in new areas but at the same time holding true to its values that have seen it through the last 174 years. The company has taken another step forward to confirm its place as one of the premier glazing and home improvement firms in the local area by opening a purpose built showroom and manufacturing unit in the Inveralmond Industrial Estate next to its head office. Managing Director, Derek Petterson, wanted to give customers an even better level of service by having a custom made showroom showing all its goods and products as they would be in their own home.

The company is fiercely proud that it is one of the few firms left in the Perth area which is family owned and run. Owned by James Petterson and run by his son Derek they have now introduced the next generation to its rank with James Grandson, Gavin. The family are driven by the regard in which the company is held in the local area and look forward to taking McLeod Glaziers to its bi-centennial in 2036!!!!

The family and staff at McLeods extend a warm welcome to all its customers past, present and future to its new show room where we can promise a new level of products and services. A private car park directly outside our head office and showroom awaits all visitors.

On a personal note, I look forward to being of service to you whatever the product or service you require and can assure you that we will give you our best attention at all times.

Derek Petterson
